Office Action Summary	Application No. 10/593,991	Applicant(s) BASILE, GIANLUIGI	
	Examiner JESSICA L. MCMILLAN	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 02 November 2006 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the applicant has omitted the date for two of the four US prior art references and the date for two of the foreign patent documents. These prior art references have not been considered. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over White (US 5,515,454) in view of Barrow (US 5,669,691) and Shapiro (US 4,132,983).

Regarding claims 1 and 3, White discloses a half-level light signaling device formed by a casing, including a lower part, which houses electrical and/or electronic circuits (see figure 2) and at least one light source (30), and a cap (22). White is silent about a prism and an antenna.

Barrow discloses an in-pavement light fixture that comprises a prism (22) located on the cap of the fixture (see figure 3). It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a prism on the cap of White as taught by Barrow in order to send out a desired light beam emitting from the signaling device so that the beam can be seen from the ground.

Shapiro discloses a warning light system that comprises an antenna arranged within a light lens (see abstract of Shapiro) that propagates a signal received from a transmitter (11) (see column 4, lines 40-46). It would have been obvious to one having ordinary skill in the art at the invention was made to include an antenna in the signaling device of White as taught by Shapiro in order to be able to detect when a signal is received to cause the light source of the device to emit light.

Regarding claim 2, White further discloses a cap that is made of synthetic resin (see column 2, lines 57-61).
